PROFESSIONAL SUMMARY

Computer Science Engineering graduate currently pursuing PG-DAC at CDAC Hyderabad (Aug 2026–Feb 2027), with a foundation in C/C++, Java, full-stack development, REST APIs, databases, and AI/ML integration. Hands-on experience building web and mobile applications, integrating features, and conducting structured software testing. Brings a problem-solving mindset, collaborative approach, and a focus on developing reliable, maintainable software.

EDUCATION & CERTIFICATIONS

PG-DAC | Centre for Development of Advanced Computing (CDAC), Hyderabad | *Aug 2026–Feb 2027*
Currently pursuing Post Graduate Diploma in **Advanced Computing**.

B.Tech, Computer Science | Bansal Institute of Research Technology & Science, Bhopal | *2022–2026*
CGPA: 7.06 (70.6%)

Class XII: 70.4% (MP Board, 2022) • **Class X:** 70% (MP Board, 2020)

Certifications: C & C++ Certificate (Sep–Dec 2023) • **NCC 'A' Certificate**, 3MP Battalion NCC, Rewa (2018–2020)

TECHNICAL SKILLS

Programming: C, C++, Core Java, Basic Python
Web & Backend: React.js, Node.js, Express.js, REST API integration
Databases: MySQL, MongoDB
AI/ML & Mobile: TensorFlow Lite, on-device AI models, Kotlin
Tools: Git, GitHub, Android Studio, Visual Studio
Core Concepts: Data Structures & Algorithms, OOP, multithreading, software testing
Soft Skills : Teamwork, Multitasking, Leadership.

EXPERIENCE

Full Stack Developer Intern | Edunet Foundation & AICTE (Online) | *Feb–Mar 2025*
- Developed a web application using React.js, Node.js, Express, and MongoDB.
- Implemented authentication, routing, and REST API integration.

Web Development Intern | CodeSoft (Online) | *Jan–Feb 2025*
- Built static and dynamic web pages using HTML, CSS, and JavaScript.

PROJECTS

AI-Based Health Diagnostic Application | *Nov 2025–May 2026*
Kotlin • Firebase • TensorFlow Lite | Team of 4; AI Integration, QA, Testing & Documentation
- Integrated on-device AI/ML models for disease prediction and real-time symptom analysis.
- Contributed to model tuning and validation; project results reported a 15% reduction in false-positive diagnosis rate.
- Led QA cycles, documented 100+ test cases, and maintained bug-tracking reports.

My Recipe Sharing Platform | *Feb–Mar 2025*
React.js • Node.js • MongoDB | Individual Project
- Built a full-stack recipe platform with CRUD functionality and keyword-based search filters.
- Optimized indexing; project results reported a 25% improvement in database query response time.

Bluetooth Chat Application | *Oct–Dec 2024*
Java • Threads • Handlers • InputStream/OutputStream | Team of 4
- Enabled multithreaded, real-time Bluetooth chat and improved connection stability through error handling and thread synchronization.

ACHIEVEMENT

- Qualified Round 1 and Round 2 of TCS CodeVita Season 13.
